IMPORTANT NOTES

- 1 There is a minimum requirement on the amount allocated into each selected fund upon each premium payment.
- 2 The annual management fee is not the same for all funds. Please refer to their respective Product Highlights Sheets for the annual management fees as well as other fees and charges.
- 3 Minimum switch amount is currently set at \$1,000 each time. There is no limit to the number of switches per year. There are currently no charges for fund switching.
- 4 Accidental death benefit is payable only if insured's death happens within 365 days of the accident.
- 5 If you are retrenched and are not able to find employment for three continuous months, you can choose not to pay the premiums for up to 24 months. VivoLink policy must be valid and in force for at least 6 months from the date of issue of the policy or the date of issue of an endorsement to include or increase a benefit, whichever is latest, with at least 6 months of premiums paid. The retrenchment benefit can only be claimed once.
- 6 Withdrawal amount must be at least \$500. After withdrawal, the policyholder needs to hold a minimum of \$1,750 worth of units under each selected fund or \$3,500 worth of units across all funds under the policy. These limits are not guaranteed, and are subject to revision by Income.
- 7 Other funds in the market refer to investment-linked plan (ILP) sub-funds excluding Income's funds. The average annual management fee is calculated using annual management fee (maximum or actual) data from Morningstar and its content providers. © 2015 Morningstar. All Rights Reserved. - 8 You may visit www.fundsingapore.com for more information on Lipper Leader ratings and how our funds rank.
- 9 We will not pay this benefit if the insured was diagnosed with the disease within 90 days from the date of policy issue, or inclusion or increase of any benefit (whichever is latest) for major cancers, heart attack of specified severity, coronary artery by-pass surgery, angioplasty and other invasive treatment for coronary artery.
- 10 This illustration is based on projected investment returns of 4% p.a. and 8% p.a. respectively. The two rates of return used are before deducting the annual management fees of the funds. They are purely for illustrative purposes and do not represent upper and lower limits on the investment performance. They also do not reflect potential volatility over the short term resulting in potential sharp movements, up or down, of the underlying assets of the funds. The actual benefits payable will depend on the actual performance of the underlying assets of the funds. The performance of the funds is not guaranteed and the cash value may be less than the capital invested.
