

Income Global Dynamic Bond Fund

Fund Summary
as of 22 October 2024

Investment Objective

The investment objective is to seek current income and long-term capital appreciation.

Investment Scope

The sub-fund intends to achieve the objective by investing all or substantially all of its assets in the PIMCO GIS Income Fund SGD (Hedged) Inc Share Class (“underlying fund”).

The underlying fund will utilise a global multi-sector strategy that seeks to combine the Investment Advisor’s total return investment process and philosophy with income maximization. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income securities.

The underlying fund uses top-down and bottom-up strategies to identify multiple sources of value to generate consistent returns. Top-down strategies are deployed taking into account a macro view of the forces likely to influence the global economy and financial markets over the medium term. Bottom-up strategies drive the security selection process and facilitate the identification and analysis of undervalued securities.

The sub-fund is denominated in Singapore Dollars.

Risks

Key Risks

Income Insurance's ILP sub-funds are intended for long-term investment, it is not suited for any short-term speculation. You should not expect to obtain any short-term gains from investing in Income Insurance's ILP sub-funds. It is important that your investment suit your risk appetite. You may wish to consult your financial adviser before investing in any ILP sub-fund.

The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur.

You should be aware that past performance is not indicative of future performance. The value of the units may rise or fall as the performance of the sub-fund changes.

The sub-fund and the underlying fund are exposed to the risks set out in this section. Given that the sub-fund invests entirely into the underlying fund, the risks associated with the underlying fund will also impact the sub-fund.

The risks described in this paragraph are not exhaustive and you should be aware that the ILP sub-fund and the underlying fund may be exposed to other risks of an exceptional nature from time to time. The risk factors may cause you to lose some or all your investments. A description of the major risks is provided below.

Market and Credit Risks

You are exposed to general market risk. The underlying fund is exposed to various general trends and tendencies in the economic and political situation as well as securities markets and investment sentiment, which may lead to substantial and longer-lasting drops in prices affecting the entire market.

You are exposed to credit risk. Changes in the financial condition or credit standing of an issuer may negatively affect the sub-fund and underlying fund. An issuer of fixed income securities may suffer adverse changes in its financial condition and unable to pay the principal and/or interest on the instrument. You may lose money if the issuer or guarantor of a Fixed Income Security in which it invests, or counterparty to a derivatives contract, is unable or unwilling to meet its financial obligations.

You are exposed to currency and interest rate risks. The value of the underlying fund is subject to currency fluctuations due to changes in exchange rates between currencies or the conversion from one currency to another that may cause the value of the underlying fund's investments to diminish or increase. The value of Fixed Income Securities held by the sub-fund is likely to decrease if nominal interest rates rise.

Fund Summary
as of 22 October 2024

Liquidity Risks

You are exposed to liquidity risks. The underlying fund is exposed to liquidity risk where it invests in derivative instruments which are difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

There is no secondary market for the underlying fund. All redemption requests should be made to the Manager. In exceptional circumstances, the sub-fund's investments in underlying funds may not be readily redeemable.

Product-Specific Risks

You are exposed to global investment risk. The underlying fund is subject to global investment risk as securities of certain international jurisdictions may experience more rapid and extreme changes in value.

You are exposed to high yield risks. The underlying fund may be subject to greater levels of interest rate, credit and liquidity risks than Funds that do not invest in such securities.

You are exposed to emerging markets risk as it invests in securities of issuers based in developing economies which may present market, credit, currency, liquidity, legal, political and other risks different from, and potentially greater than, the risks of investing in developed foreign countries.

The underlying fund may be subject to risks from directly investing in Fixed Income Instruments traded on China Inter-Bank Bond Market. It may be exposed to liquidity risks, settlement risks, default of counterparties and market volatility associated with China Inter-Bank Bond Market.

You are exposed to derivatives risks. The underlying fund may invest in derivatives for hedging and Efficient Portfolio Management purposes that are subject derivative risks including liquidity risk, interest rate risk, market risk, credit risk and management risk. The value of derivatives can be volatile because a small movement in the value of the underlying asset can cause a large movement in the value of the derivative, resulting in losses in excess of the amount invested by the underlying fund. Derivatives will typically be used as a substitute for taking a position in the underlying asset.

All or part of the underlying fund Management Fees may be charged to the capital of the sub-fund, and on redemption investors may not receive back the full amount invested.
