How DIRECT Star Protect Pro covers you against life's uncertainties

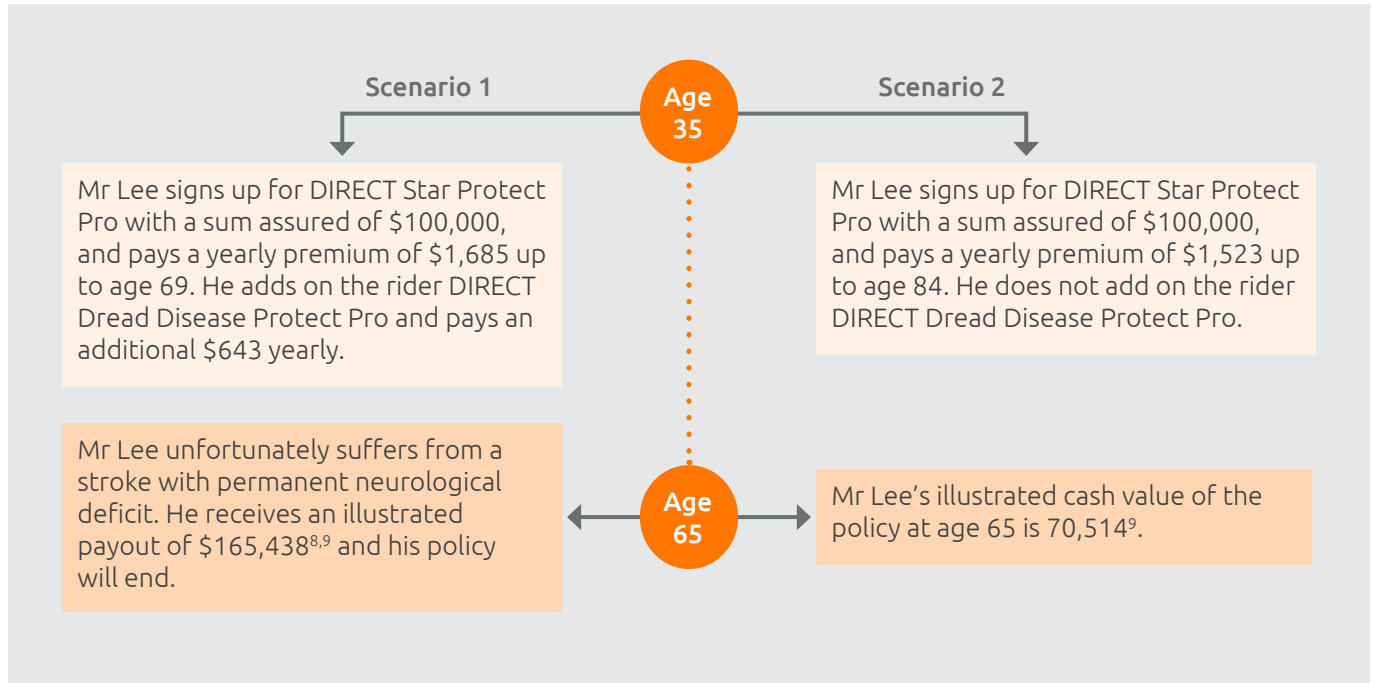

Diagram is not drawn to scale. The figures used are for illustrative purposes only and are rounded to the nearest dollar. The figures above are based on a 35 year old male customer.

The non-guaranteed figures above are based on the assumption that the Life Participating Fund earns a long-term average return of 4.25% p.a.

Should the long-term average return be 3.00% p.a., the illustrated payout if Mr Lee suffers a stroke with permanent neurological deficit based on Scenario 1 would be \$120,590^{8,10} and Mr Lee's illustrated cash value of the policy at age 65 based on Scenario 2 would be \$48,436¹⁰.
